

This Happens Nearly 700,000 Times Every Year.

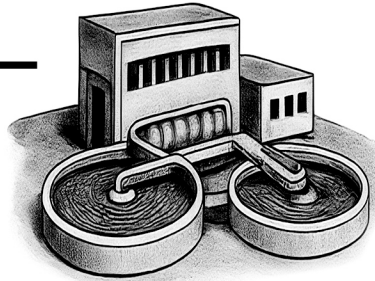

**Mother takes
abortion pills.**

**Mother delivers
human remains and
flushes them
down the toilet.**

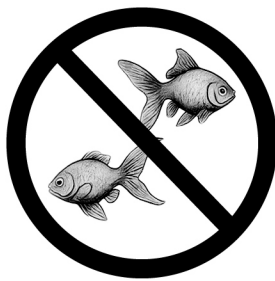

**Abortion drug
contaminants
polluting our
drinking water?**

**Water treatment
plants are not
designed
to remove
abortion waste.**

The EPA discourages flushing anything other than toilet paper, and numerous state laws specifically prohibit flushing medical waste. Yet for decades, the FDA and EPA have allowed abortion providers to instruct women to flush tons of human remains into our water systems.
